OBJECTIVE

The objective of this exercise is to provide the steps needed to create SAP analytics Cloud story to enable user plan maintenance Cost

SCENARIO

This exercise follows the scenario you were introduced to in the demo Maintenance Cost & Sustainability Planning for Bagnoli & Co.
This exercise explains how to create SAP Analytics Cloud Story for Maintenance Cost Budgeting.

ENVIRONMENT ACCESS – SAP ANALYTICS CLOUD

Before the exercise, please obtain the Tenant details and Login Credentials of SAP Analytics Cloud provided to you as instruction below.

SAP Analytics Cloud (To login SAP Analytics Cloud and perform the exercise.)

- Tenant URL
- Username: Your assigned User ID
- Password: Your assigned User Password

For the Bootcamp participants, please use the SAP Analytics Cloud tenant provided by SAP, and your assigned user id and password.

- The SAP Analytics cloud tenant URL is available in the dedicated Microsoft Teams > General (Channel) > System Access (Tab) > SAP Analytics Cloud (Section), which you have been invited.
- Your assigned user id and password for SAP Analytics Cloud are communicated individually via email.

PREREQUISITES

You have completed exercise 1 and 2.

EXERCISE STEP DETAILS

Explanation	Screenshot
Log on to SAP Analytics Cloud with the given tenant URL and assigned user credential mentioned above. Go to the Home Screen.	
Explanation	Screenshot
Click on the stories  Icon, the system opens home page for Stories.	Click on Create New -> Responsive	
Explanation	Screenshot
In the design mode selection pop up select Classic Design Experience and click Create	Right Click on the right lane and choose Remove	
Explanation	Screenshot
Click on the Page 1 and select Rename	Rename the page Create Maintenance Plan and click on Rename	Click on the title and type “Maintenance Cost Budgeting: Generate Proposal”	
Explanation	Screenshot
Click on Designer -> Styling and in the Border select Bottom Border. Click on Designer again to come out of the styling	In the Insert menu click on  to insert a table in the story	
Explanation	Screenshot
In the model selection pop up click on name and select other model	Select the maintenance cost budgeting model created in exercise 1	
Explanation	Screenshot
The table shows the Maintenance Cost Local Currency Measure and version -> Actual	
Version Managment

We need to create the Proactive Maintenance and Cyclic Maintenance Version to simulate the Plan cost of each version. To create these versions, follow the below steps, • Click on the table and select the (Version Management) in the tolls menu • The Version Management dialog appears • In the Public Versions section Actual Version is available. Click on • Copy Data to Private Version screen appears. Provide following values	 Version Management

Explanation	Screenshot
○ Version Name: Proactive Maintenance ○ Category: Planning ○ Create Blank version • Click OK • System creates a private version. We need this version available for all users so we will publish this version as public version. Click  and select publish as • Provide Name: Proactive Maintenance & Category Planning & click on Publish • Repeat the same task to create public version for Cyclic Maintenance and call at “Cyclic Maintenance”. • Also create public version to store final maintenance Budget. Call it “Maintenance Plan” • After completing the steps, you will have 4 public versions • Close the Version Management dialogue.	 Actual Version is available in the public version section  Copy Data to Private Version Selection  Publish to Public Version 

Explanation	Screenshot
	Publish Proactive Maintenance Version   All Public Versions  Close Version Management

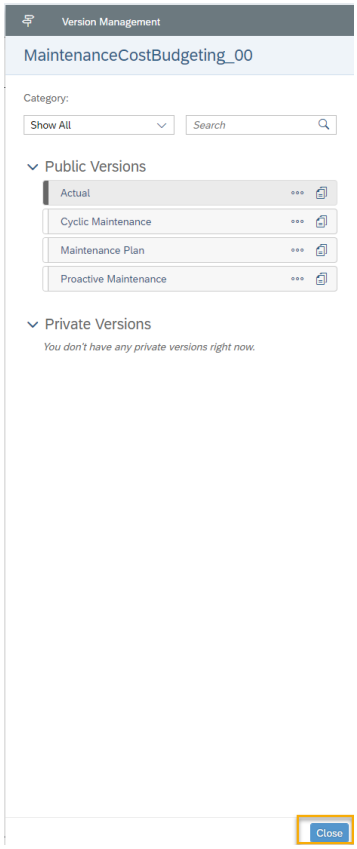
Explanation	Screenshot
	


Table Configuration

In the next steps we will configure the table control. Click on the table and navigate to Designer -> Builder. In the Rows section click on + Add Measures/Dimensions and select following dimensions, • Functional Location • Equipment • Maintenance Category	Table Row Configuration 
Explanation	Screenshot
In the Column Section Version and Measure is available already. Add Date dimension in the column section by clicking + Add Measures/Dimensions in the column section	Click on ••• beside the Date dimension and click on Hierarchy. Select Year, Month as hierarchy and click on Set	Move the Date dimension as the first dimension in the column and untick the Unbooked Data Column	
Explanation	Screenshot
In the Filters section click on Version Dimension. Remove all the versions in the selected member. Select Show unbooked members and select versions Actual, Cyclic Maintenance and Proactive Maintenance and click OK	
Explanation	Screenshot
In the Filters section click on + Add Filters and select Date (Member). Select 2020,2021 and 2022 and click OK	Click on to Save the story.	
Explanation	Screenshot
Provide Name Maintenance_Cost_Budgeting_XX and click on Ok	Expand the table to view the data.	
Story Filters

Maintenance planners will plan for their own company codes, Plants, and functional locations. Include story filter to select these dimensions Click in the tools section, The add story filter function is added to the story	
Explanation	Screenshot
Click on Add Story Filter and select Dimension	Click on Company Code and select Company Code (Dimension)	Select the master data members and click OK	Repeat the above steps to include story filters for	
Explanation	Screenshot
Plant, Cost Center and Functional Location	
Styling Rules	
The actual data should not be editable in the table interface. Styling Rules will be defined to make the actual data read only and to distinguish between editable and non-editable cells	
Select any cell in the actual column and click on  in the Designer section	Click on + in the Style option to add a new style	
Explanation	Screenshot
Name the Style as Actual. In the Cell select Cell Fill as Grey and click Apply	Click on + in the Styling Rules section to add a new Styling Rule	
Name the Styling rule as Actual. Configure the content section as shown in the screenshot	
Explanation	Screenshot
Select Style -> Actual & Read Only setting as Read-Only. Click Ok	Actuals are greyed out and are not editable	Save the story and navigate back to the home screen	
Data Actions	
The maintenance planner would like to generate plan for 2022 based on the historical data. In This section will create Data actions to generate maintenance plan based on history	
Click on  in the SAP Analytics Cloud home page to open the Data Action page	
Explanation	Screenshot
In the Data Actions page click on Create New	Provide the below information and click on Save Name: Create_Proactive_ Plan_XX Description: Create Proactive Plan Default Model: MaintenanceCostBudgeting _XX	Click on Parameter {} to define the user selection for the data action	
Explanation	Screenshot
In the parameter screen click on Create Parameter	Provide Following values ID : CompanyCode Measure Dimension: Company Code Cardinality: Single Input: Dynamic Name for Prompt: Company Code Click Done	Repeat the same steps to Create the following parameters • Plant • CostCenter • Functional Location • Proactive_Maintenace Year • BudgetYear • Version	

ID	Measure/ Dimension	Cardinality	Input	Hierarchy	Level	Name for Prompt
Plant	Plant	Single	Dynamic	Not applicable	Not applicable	Plant
SourceVersion	Version	Single	Fixed Member: Actual	Not applicable	Not applicable	Source Version
CostCenter	Cost Center	Single	Dynamic	Not applicable	Not applicable	Cost Center
Functional Location	Functional Location	Any	Dynamic	Not applicable	Not applicable	Functional Location
Proactive_MaintenaceYear	Date	Single	Dynamic	Year, Quarter ,Month	Any	Proactive Maintenance Year

Explanation	Screenshot
	<table><tr><td>BudgetYear</td><td>Date</td><td>Single</td><td>Dynamic</td><td>Year, Quarter ,Month</td><td>Any</td><td>Budget Year</td></tr></table>
After defining the parameters, the list of parameters will look like this	Click on  to add copy step	The Copy step configuration screen opens	Provide name: Copy Proactive Maintenance	

Explanation	Screenshot
In the filter click on the Version select parameter Source Version	Click + Add Filter	Select Company Code and in the filter, screen click on Parameters and Select the Company code parameter created in the above step. Click ok. Repeat the same task to add filters for Plant, Cost Center & Functional Location	
Explanation	Screenshot
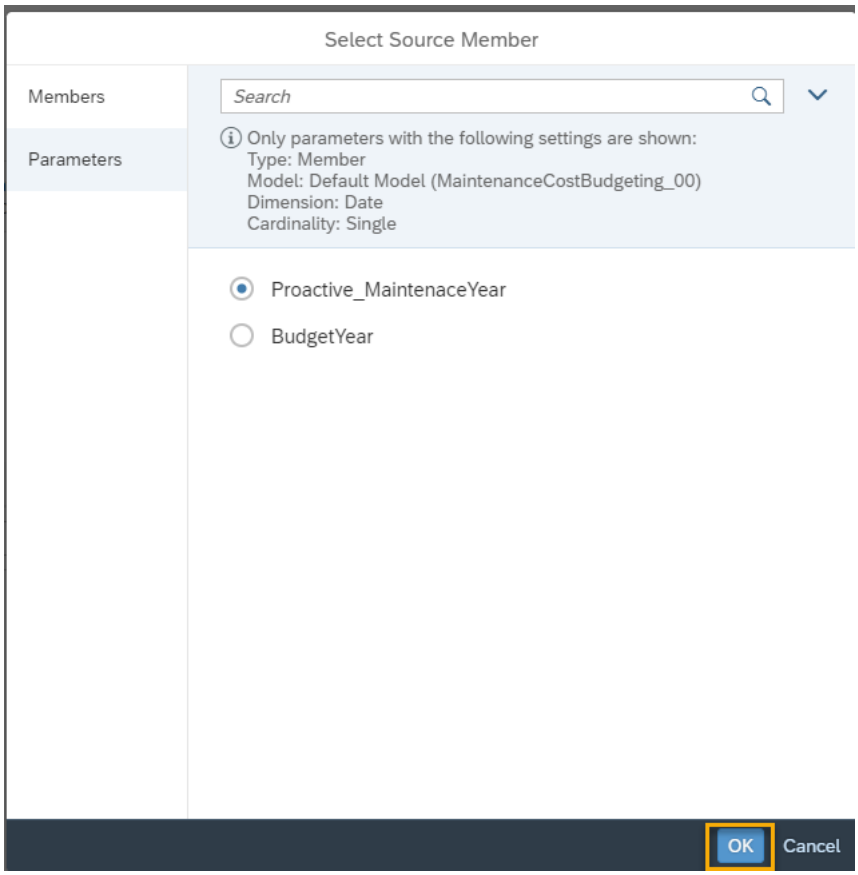
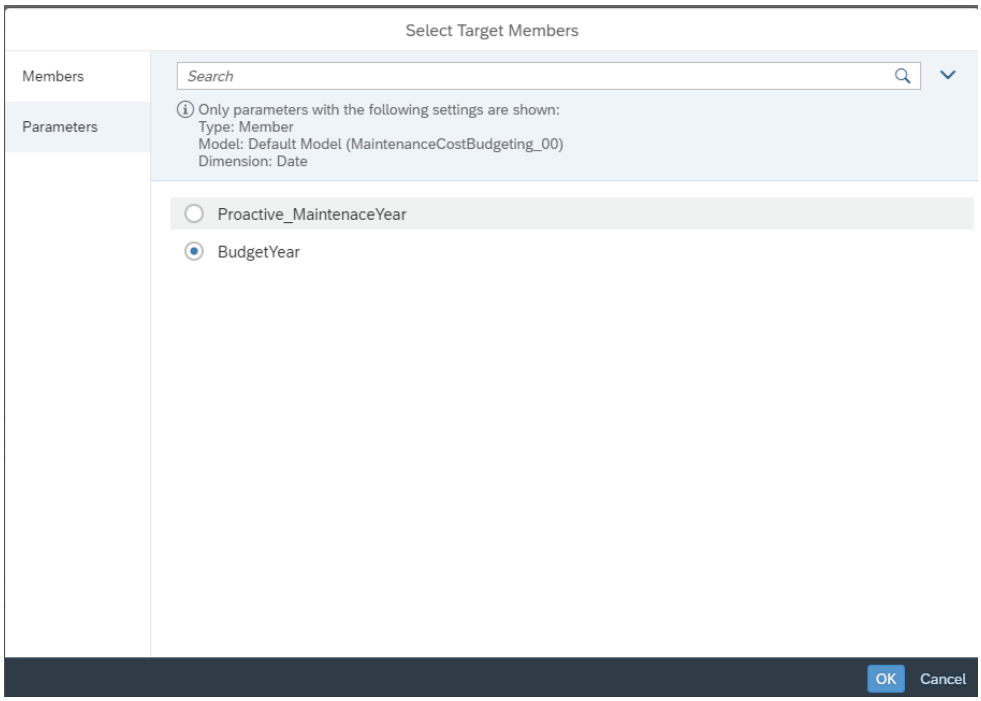
	
Click on + Add Copy Rule	In the copy rule select dimension Date Click the From and click on Parameter. Select Poractive_MentenanceYear parameter and click ok Click the To click on Parameter. Select BudgetYear and Click Ok	

Explanation	Screenshot
	 




Explanation	Screenshot
Keep the Write mode overwrite and save the data action	Navigate Back to the Data Action page	
Select the Data action created and click on 	In the Copy Data Action Dialogue Provide Name: Copy_Cyclic_Plan_XX Description: Create Cyclic Plan and click OK	
Explanation	Screenshot
The Data action will be created. Click on the data action to edit it.	Click on the Parameters. The Parameter List is displayed	Click  next to the Proactive Maintenance Year Parameter.	
Explanation	Screenshot
Change the ID to Cyclic_MaintenanceYear and Name for Prompt to Cyclic Maintenance Year and click Done	Click on the Copy step and Navigate to the Copy Rules. Change the From Values to include the new renamed parameter Change the name of the step to Copy Cyclic Maintenance. click on Save	 Change to
Navigate back to the Data Action Page	
Select the Data action created above and click on  (Copy)	
Explanation	Screenshot
In the Copy Data Action Dialogue Provide Name: Copy_to_Budget_XX Description: Create Maintenance Budget and click OK	Click on the data action to Edit	Click on {} (Show Parameter List)	Delete the Cyclic Maintenance Year Parameter by clicking on 🗑 next to the parameter	Click on the step to edit it. Make following changes • Name: Create Budget • Delete the Copy Rule by clicking the 🗑 next to the rule	
Explanation	Screenshot
Save the Data Action	Including Data Actions in Story	
Navigate to the home page and click on 	
Explanation	Screenshot
Click on the Maintenance_Cost_Budgeting_XX story	The story open in view mode. Click on Edit	In the Insert menu click on + and select Planning Trigger	
Explanation	Screenshot
In the trigger type selection pop up select Data Action Trigger	The Data Action trigger settings opens. In the Data action Select the data action Create_Proactive_ Plan_XX In Label type Create Proactive Plan Check “ Publish Target Version Automatically”	
Explanation	Screenshot
All the parameters defined in the Data action will be available. For the Target Version Parameter Click on the Input and select fixed Value Click the value box and select version public.Maintenance Plan and click Ok	For Company Code parameter in the Input Select fixed Value. click on Value-> Story Filter. The system will pick up the value from the story filter	
Explanation	Screenshot
Repeat the same process for the following Parameters • Cost Center • Plant • Functional Location Save the story	Drag the Data action on top of the table	
Explanation	Screenshot
Repeat the same steps to include data action Copy_Cyclic_Plan_XX in the story	Save the story	

Explanation	Screenshot
Click on Create Proactive Plan Data action	In the pop up enter the values as shown and click on Run	The Data action runs successfully and the Proactive maintenance plan for 2022 is generated	Click on the Create Cyclic Plan Data action	
Explanation	Screenshot
In the pop up enter the values as shown and click on Run	The Data action runs successfully and populates the Cyclic Maintenance Plan for 2022	Include a time series chart to show the trend of the maintenance cost. To include chart click on Insert->Chart	
Explanation	Screenshot
The chart is inserted below the table. Drag and drop the chart on top of the table	Select the chart and open Designer-> Builder	
Explanation	Screenshot
Make following selection Measure: Maintenance Cost in Local Currency Dimension : Date In Color Add Dimension Version. Select Chart type : Trend->Time Series	In the Filters click on version and select Actual Proactive Maintenance Cyclic Maintenance and click OK	
Explanation	Screenshot
Adjust the chart length appropriately and save the story	We will also include a bar chart to show a quick comparison of proactive maintenance cost and cyclic maintenance cost for 2022. Insert a chart and position it next to the data actions. Configure the chart as shown	
Explanation	Screenshot
Save the Story	
Adjust the Generated Plan

Click on  -> Responsive to add a new page to the story	Rename the Page	
Explanation	Screenshot
Keep only lane in the page by deleting the right lane	Click in the Title and enter “Maintenance Cost Budget : Adjust Proposal” as the page title	
Explanation	Screenshot
Insert a table and configure as shown	
Explanation	Screenshot
Insert Data Action Trigger and configure as shown . Use the Data Action Copy_to_Budget_XX	Save the Story	

Explanation	Screenshot
Select functional location “1010-SSF-SAC-PLAR1-CTM1” in the story filter. The table display is adjusted accordingly	Use the table control to manually adjust the of maintenance cost. Select March 2022 for proactive maintenance category of the proactive maintenance version and right -10% and press enter	SAC reduce the cost by 10%	Right Click on the cell and select Add Data Point Comment	
Explanation	Screenshot
The comment dialog box opens. Provide reason for the cost reduction and click on Add Comment	The data point comment is added to the cell	Save the changes to the database by selecting Publish Data	
Explanation	Screenshot
Insert a chart to show comparison between Proactive, Cyclic and Plan version for 2022. Configure the chart as shown	
Explanation	Screenshot
	Click on data action Create Budget	Select Source Version and Click on Run	
Explanation	Screenshot
The data action runs successfully, and the plan version is available in the chart for comparison	Select all functional location in the story filter and rerun te data action to copy proactive plan version to budget version Maintenance Plan	
Explanation	Screenshot
Rename the page and save the story	Review the Sustainability	
Add a new page	Rename the page Sustainability	Remove the right lane. Add title Sustainability: Review Energy Consumption and CO2 Emission	
Explanation	Screenshot
Insert Table and Configure the table as shown	 Insert Chart to show the energy consumption and CO2 emission in different versions for 2022	Energy Consumption

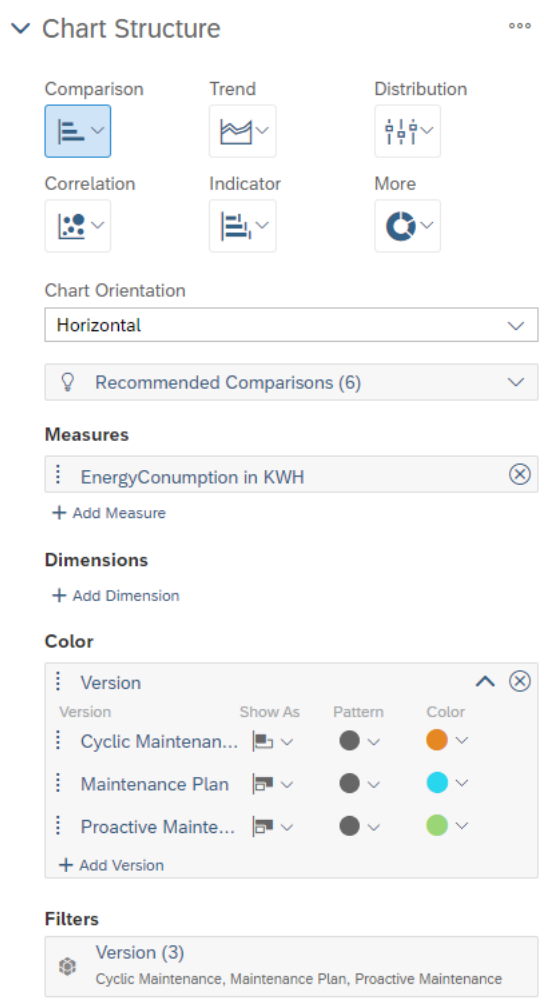
Explanation	Screenshot
	


Explanation	Screenshot
	Save the story	
Explanation	Screenshot
